

METHOD, SYSTEM AND COMPUTER PROGRAM FOR MANAGING USER AUTHORIZATION LEVELS

ABSTRACT OF THE DISCLOSURE

An embodiment of the invention is a method of managing user authorization levels for access to a plurality of applications. The method includes receiving a request from a user to establish a user profile and establishing an employment indicator for the user. A user authorization level template is obtained in response to the employment indicator. The user authorization level template identifies a plurality of applications and a user authorization level for each application. The user authorization levels are then associated with the user.
